github.com/fikrihidayatulloh16 | [Personal Portfolio](#)

Junior Software Engineer (Cloud & Infrastructure Enthusiast) | AWS Certified Cloud Practitioner. Specialized in architecting scalable SaaS solutions using **NestJS**, **TypeScript**, and **Linux Systems**. Experienced in managing self-hosted infrastructure using Proxmox VE.

EDUCATION

Politeknik Negeri Bandung

Applied Bachelor of Computer Science (D4 Teknik Informatika)

Bandung, Indonesia

Aug 2020 – Aug 2025

EXPERIENCE

Lead Fullstack Engineer (Self-Employed)

Jan 2026 – Present

BKLM Solutions (SaaS Project) | [Live URL](#)

Remote

- Architected "BKLM CBT", a production-grade assessment platform on **Linux (Ubuntu/Proxmox)** infrastructure, automating workflows for 500+ users.
- Engineered a **real-time observability system** using **WebSockets** and **Redis** to monitor live exam connectivity, reducing support tickets by 90%.
- Implemented full-cycle DevOps: Containerized services using **Docker** and **PM2**, also secured networking via Cloudflare Tunnels.
- Developed a Modular Monolith backend using **NestJS (TypeScript)** and PostgreSQL, ensuring Clean Architecture and maintainability.

Fullstack Engineer Intern

June 2024 – Oct 2024

PT Ramu Prima Persada (Construction & IT Consultancy)

Bandung, Indonesia

- Developed a web-based construction progress monitoring application using PHP and MySQL to streamline project tracking and reporting.
- Collaborated with the IT team to troubleshoot hardware and network issues in a corporate environment.

PROJECTS

Personal Cloud Infrastructure (Home Lab) | *Proxmox VE, Linux, Docker*

Nov 2025 – Dec 2025

- Built a high-availability Private Cloud on bare-metal hardware using **Proxmox VE (Debian-based)**, managing LXC containers for isolated development environments.
- Configured networking security policies using Cloudflare Zero Tunnels to expose services safely without public IP exposure.

Web Security & Performance Research | *Python, Flask, Grafana*

Jun 2025 – Jul 2025

- Developed **Python scripts** to automate performance log collection and visualize system metrics on custom **Grafana dashboards**.
- Analyzed security-performance trade-offs by implementing Rate Limiting and RBAC.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Bash/Shell, PHP, HTML/CSS

Frameworks: NestJS, Next.js, Flask, React, Node.js, Astro.JS, Spring

Database: PostgreSQL, MySQL, SQLite, MongoDB

Developer Tools: Docker, Git, Socket.io, TanStack Query, Prometheus, Grafana, Sanity.io, Redis

Infrastructure: AWS Certified Cloud Practitioner, Proxmox VE, Cloudflare Tunnels, Linux (Ubuntu/Debian)
