github.com/fikrihidayatulloh16 | [Personal Portfolio](#)

Junior Software Engineer (Cloud & Infrastructure Enthusiast) | AWS Certified Cloud Practitioner. Specialized in architecting scalable SaaS solutions using NestJS, TypeScript, and Linux Systems. Experienced in managing self-hosted infrastructure using Proxmox VE.

EDUCATION

Politeknik Negeri Bandung

Applied Bachelor of Computer Science (D4 Teknik Informatika)

Bandung, Indonesia

Aug 2020 – Aug 2025

EXPERIENCE

Freelance Software Engineer

Feb 2026 – Present

AI Translation Platform

Remote

- Engineered an end-to-end automation tool using Go and Svelte to scrape web data, eliminating manual entry by 85% and reducing report generation time from minutes to seconds
- Integrated LibreTranslate to automatically translate scraped data into Japanese, creating an efficient AI-driven workflow pipeline. reducing API subscription overhead by 100% and overall cost-efficiency by 75%.

Lead Fullstack Engineer | [Live App](#)

Jan 2026 – Feb 2026

BKLM CBT Assessment System

Remote

- Architected a production-grade assessment platform using TypeScript Backend, Next.js (ReactJS), and PostgreSQL and deployed on self-hosted infrastructure, automating manual administrative workflows for counseling departments by 80% efficiency. Accelerated result delivery from several weeks to just 1-3 days
- Engineered a real-time observability system using WebSockets and Redis to monitor live exam connectivity, reducing support tickets by 90%.

Fullstack Engineer Intern

June 2024 – Oct 2024

PT Ramu Prima Persada (Construction & IT Consultancy)

Bandung, Indonesia

- Developed a web-based construction progress monitoring using PHP and MySQL to streamline project tracking and reporting. standardizing reporting formats and reducing manual reporting and monitoring effort by 80%.
- Collaborated with the IT team to troubleshoot hardware and network issues in a corporate environment.

PROJECTS

Personal Cloud Infrastructure (Home Lab) | *Proxmox VE, Linux, Docker*

Nov 2025 – Dec 2025

- Built a Private Cloud using Proxmox VE, managing LXC containers for isolated development environments, achieving 95% cost savings for first-stage live application.
- Configured networking using Cloudflare Zero Tunnels to expose services safely without public IP exposure that increase 20% security from attack surface reduction, and optimizing network routing for self-hosted applications.

Web Security & Performance Research | *Python, Flask, Grafana*

Jan 2025 – Jul 2025

- Developed **Python scripts** to automate performance log collection and visualize system metrics on custom **Grafana dashboards**.
- Analyzed security-performance trade-offs by implementing Rate Limiting and RBAC, resulting in a 10% reduction in CPU utilization during high-traffic simulations.

Student Attendance System | *Java, Spring Boot, WebSocket, Hibernate*

May 2025 – Jul 2025

- Engineered a backend system using **Java Spring Boot**, translating strict functional specifications into secure RESTful APIs for student tracking, and CRUD operations using **Spring Data JPA (Hibernate)**.
- Implemented real-time bi-directional communication using **WebSocket** to push students check-in notifications to the Admin Dashboard.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP, Go

Frameworks: NestJS, Next.js, Flask, React, Node.js, Astro.JS, Spring Boot, Svelte

Database: PostgreSQL, MySQL, SQLite, MongoDB

Developer Tools: Docker, Git, Socket.io, TanStack Query, Prometheus, Grafana, Sanity.io, Redis, Hibernate

Infrastructure: AWS Certified Cloud Practitioner, Proxmox VE, Cloudflare Tunnels, Linux (Ubuntu/Debian)
